Machine Learning: Executive Briefing

SOLVING NEW KINDS OF PROBLEMS

Simon Allardice STAFF AUTHOR, PLURALSIGHT @allardice www.pluralsight.com

HOW YOU CAN WRITE

AN INTRODUCTION TO MACHINE LEARNING

(WITHOUT KNOWING ANYTHING ABOUT IT)

STEP 1: CHOOSE YOUR STYLE

HYPE

HAND-WRINGING

MACHINE LEARNING

HAND-WRINGING

YES

GOOD

WONDERFUL

WILL HELP EVERYONE!

NO

BAD

CREEPY

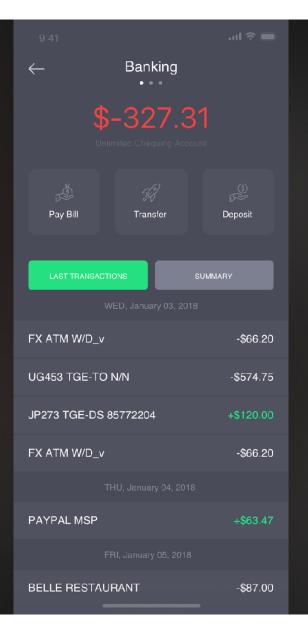

WILL KILL EVERYONE!

IS IT TRUE?

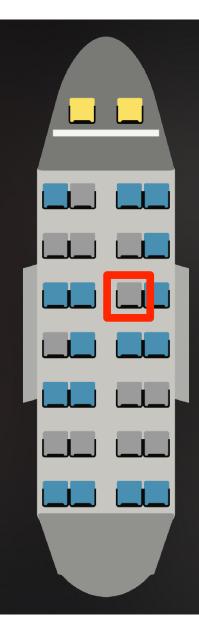

IS IT FALSE?

PROGRAMMING WITHOUT MACHINE LEARNING

PROGRAMMING WITHOUT MACHINE LEARNING

Machine Learning is *not* a new way to solve familiar problems

Machine Learning is a way to solve **new kinds of problems**

How much is a good price for this new product?

How often should we send marketing emails?

How likely is it this customer will renew?

Is the discussion positive or negative?

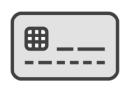

Are there indications our website is about to be attacked?

We must **build our ability** to **recognize** these situations

Embrace Machine Learning Clichés

Is this email spam or not spam?

Is this purchase fraudulent?

What product to recommend?

Is there a flower in that photo?
