Preparing Data for Use

Pooja Gandhi

LEAD ANALYTICS ENGINEER | PLURALSIGHT 2X TABLEAU ZEN MASTER

@DrexelPooja thedataduo.com

Overview

Data interpreter

Transform your data

Union your data

Data Interpreter

What does data interpreter do?

Gives you a head start when cleaning your data

Detects titles, notes, footnotes, empty cells

Bypasses flaws to identify actual fields and values in your dataset

Detect tables and sub-tables within your worksheets

Available for

- Microsoft Excel
- Text files
- PDF files
- Google Sheets

Example

Annual Report			
Year	Order ID	Order Date	Ship Date
2017	CA-2017-152156	11/8/17	11/11/17
	CA-2017-152156	11/8/17	11/11/17
	CA-2017-138688	6/12/17	6/16/17
2016	US-2016-108966	10/11/16	10/18/16
	US-2016-108966	10/11/16	10/18/16
2015	CA-2015-115812	6/9/15	6/14/15
	CA-2015-115812	6/9/15	6/14/15

In this demo, you will learn -How to use data interpreter

Keep in Mind

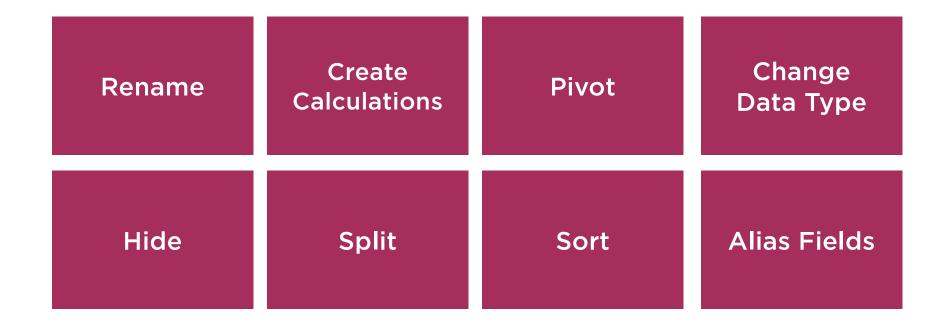

Data interpreter is not available

- If the data source is already in the format Tableau can interpret
- If the data contains many rows and many columns
 - 2000 columns
 - 3000 rows and 150 columns
- If the data source is not supported

Transform Your Data

Transform Your Data

In this demo, you will learn -How to transform your data

Union Your Data

Union Your Data

Table 1

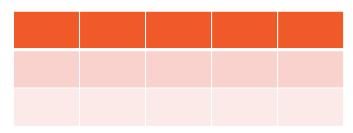

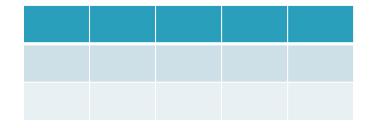

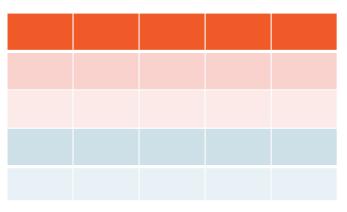

Table 2

Single Table

In this demo, you will learn – Union your data

Summary

In this module, we learnt –
Data interpreter
Transform your data
Union your data

Things to Remember

Use data prep if your data needs more cleaning

To union your data, the tables must come from the same connection

Fields generated as a result of a union can be used in a pivot

Stored procedures can not be unioned
